

DEVELOPMENT AID FROM PEOPLE TO PEOPLE

DAPP ZIMBABWE

Who we are

Development Aid from People to People Zimbabwe (DAPP) is a NGO registered in Zimbabwe with the Ministry of Labour and Social Services in 1980. The registration number is W0/22/80.

DAPP Zimbabwe is operating in Mashonaland Central, Mashonaland East, Mashonaland West, Manicaland, Harare and Masvingo Provinces.

The organization is working in the areas of education and training, health, water and sanitation, community development and agriculture. DAPP implements 14 Developments projects. The organization employs more than 80 staff, works with at least 400 volunteers and benefit nearly 350.000 people annually.

DAPP is part of the international Humana People to People Movement, which has 31 member organizations in 42 countries in Africa, Asia and Latin America, Europe and United States.

Our approach

The Mission of DAPP Zimbabwe is to implement quality community-led projects in order to empower the people with knowledge, skills and tools to improve their well-being in five sectors, namely Community Development, Agriculture, Education, Health and Emergencies.

DAPP's work is based on the ethos of Solidary Humanism, which means "man standing shoulder to shoulder with mankind" and "the people at the centre of development", both in the decision-making, the actual implementation and the ongoing evaluation of the work.

DAPP makes use of the programs developed by Humana People to People, which have been implemented among the Poor in three continents and shown proved impact for millions of people.

DAPP works with both financial and technical partners in order to reach the highest impact. Individual programs are developed in close cooperation with partners where ideas and experiences are shared.

Each project is led by an experienced Project Leader, who again gets support from the national program and finance offices.

The projects employ local staff and mobilizes and trains community members to play an active part.

Key Program Accomplishments in 2015

118 students joined the education and skills training programs at the two Ponesai Vanhu Schools (60 at the Junior School and 58 at the Technical College).

103 key staff from Humana People to People projects globally were trained at the Frontline institute in program development and management

3037 farmers participated in the Farmers' Clubs program and improved their income, food security and general welfare.

10 000 families were active in the Child Aid program. The Child Aid program harvested many results, some examples:

- 2396 latrines built
- 160 pre-schools supported
- 453 orphans supported
- 1906 youth active in clubs
- 9668 trees planted
- 67 nutrition gardens established
- 85 community health clubs established
- 2562 families with streng-thened food security and income (\$110 to \$830 per farmer from sale of their garden produce per planting season).
- **Start Up** of a three year TB program in Chimanimani and Mutasa

- HOPE Harare
- HOPE Bindura

Community Development

- Child Aid Rushinga
- Child Aid Mwenezi,
- Child Aid Bindura
- Child Aid Nyanga/Mutasa

Our Partners

DAPP Zimbabwe has a number of partners, both at local and global level. Here some of the main partners: USAID, TB Alert, UNEP, UNICEF, Practical Action, Oak Foundation, Capernaum Trust, HOSPAZ and local businesses.

What our partners are saying:

USAID about C-WASH: "We are happy to notice and witness C-Wash developmental initiatives on provision of safe water, proper sanitation and basic hygiene practices to rural communities of Chimanimani, Mutasa, Chipinge, and Nyanga. Districts of Manicaland"

TB ALERT about TC-TB Mutasa Chimanimani: "TB Alert has seen DAPP Zimbabwe develop its skills and experience on TB and HIV/TB activities over the past year and is pleased with the quality of programming and engagement at the grassroots level."

PRACTICAL ACTION about Child Aid Mwenezi: "Practical Action has worked in partnership with DAPP on a 4-year rural WASHE project in Mwenezi District of Zimbabwe, funded by ACP-EU Water Facility Programme of the EU. DAPP successfully employed a community-based approach to effectively build the local capacities at community and institutional levels. The ripple effect has seen families and communities adopting improved WASHE practices using their own resources. We regard DAPP as our preferred development partner of choice, given its professional approach and level of accountability demonstrated in this partnership."

OAK FOUNDATION about Hope Bindura: "Oak appreciates the significant impact on the lives of the adolescents in creating sexual reproductive health rights awareness. Most of the beneficiaries have grown a sense of belonging to all the programmes. We notice the consistent transformation of youth/adolescents' lives living in rural areas or high density areas in the small town of Bindura. Beneficiaries tell moving stories about how they have had their lives upgraded socially and economically which is really interesting."

HOSPAZ about Hope Bindura: "We appreciate the work we have done together. Your commitment to positively change the lives of adolescents in your communities including GBV prevention in adolescents and youth is very commendable"
